CUTTING LIST

No.	Item	Quantity	Provided By
1	Computer/laptop with Postman installed	1 per candidate	Institution
2	Stable internet connection	1 per candidate	Institution
3	Free test API: https://jsonplaceholder.typicode.com	Access for all	Assessor
4	Practical task sheet	1 per candidate	Assessor

5	Practical assessment documentation and stationery	1 set per candidate	Institution

INSTRUCTIONS TO THE ASSESSOR

- ✓ *Ensure the computer is functional and Postman opens and runs correctly.*
- ✓ *Confirm that the internet connection can reach JSONPlaceholder before the assessment begins.*
- ✓ *Explain the assessment procedures to the candidate without demonstrating the skills being assessed.*
- ✓ *Observe the candidate throughout the practical assessment.*
- ✓ *Award marks only for tasks that are correctly performed or demonstrated.*
- ✓ *Record the marks in the Candidate Score column and relevant observations in the Comments column.*
- ✓ *Verify that the candidate saves all requests in a collection named Practical_Test_[YourName].*
- ✓ *Remind the candidate that JSONPlaceholder is a fake API: POST, PUT, PATCH and DELETE return realistic responses but data is not saved.*
- ✓ *The Practical Observation Checklist carries 30 marks.*
- ✓ *The Product Checklist carries 5 separate marks and must not be added to the 30 practical marks.*
- ✓ *Complete the competence decision, then sign and date the document.*

A. PRACTICAL OBSERVATION CHECKLIST: 30 MARKS

TASK 1: SET UP AND GET ALL RECORDS: 6 MARKS

No.	Items to be Evaluated	Allocated Marks	Candidate Score	Comments
1	Launches Postman and creates a collection named Practical_Test_[YourName]	1		
2	Creates a new HTTP request and selects the GET method	1		
3	Enters the correct URL https://jsonplaceholder.typicode.com/users	1		

4	Clicks Send and identifies the status code (200 OK), response time and size	2		
5	Identifies the number of users returned (10) and views the body in the Pretty view	1		
	TASK 1 TOTAL	**6**		

TASK 2: GET SINGLE RECORD, ERRORS AND QUERY PARAMETERS: 6 MARKS

No.	**Items to be Evaluated**	**Allocated Marks**	**Candidate Score**	**Comments**
6	Sends GET to /users/3 correctly	1		
7	Reads the name, username and email (Clementine Bauch, Samantha, Nathan@yesenia.net)	2		
8	Sends GET to /users/9999 and identifies the 404 Not Found status	1		
9	Explains the difference between a 200 and a 404 status code	1		
10	Uses the Params tab to send userId = 2 to /posts and obtains the filtered results	1		
	TASK 2 TOTAL	**6**		

TASK 3: CREATE DATA USING POST: 6 MARKS

No.	Items to be Evaluated	Allocated Marks	Candidate Score	Comments
11	Selects POST and enters the correct /posts URL	1		
12	Selects Body → raw → JSON	1		
13	Enters valid JSON (title, body, userId) with correct braces, quotes and commas	2		
14	Sends the request and identifies the 201 Created status	1		
15	Identifies the new id (101) in the response	1		
	TASK 3 TOTAL	**6**		

TASK 4: UPDATE AND DELETE DATA (PUT, PATCH, DELETE): 6 MARKS

No.	Items to be Evaluated	Allocated Marks	Candidate Score	Comments
16	Creates a PUT request to /posts/1 with a complete JSON body	2		
17	Obtains 200 OK and shows the updated values in the response	1		
18	Creates a PATCH request to /posts/1 that updates only the title	1		
19	Explains the difference between PUT and PATCH	1		
20	Creates and sends a DELETE request to /posts/1 and identifies 200 OK with an empty {} body	1		
	TASK 4 TOTAL	**6**		

TASK 5: TEST SCRIPTS AND COLLECTION RUNNER: 6 MARKS

No.	Items to be Evaluated	Allocated Marks	Candidate Score	Comments
21	Writes a working test in the Tests tab checking the status code is 200	1		
22	Writes a working test checking the response time is below 1000 ms	1		
23	Adds a test to the POST request checking the status code is 201	1		
24	Runs the whole collection using the Collection Runner	2		
25	Interprets the pass/fail summary correctly	1		
	TASK 5 TOTAL	**6**		
Task 5	Test Scripts and Collection Runner	6		
	TOTAL PRACTICAL MARKS	**30**		

B. PRODUCT CHECKLIST: 5 MARKS

Important: These 5 marks are separate from the 30 practical marks. They assess the final products/evidence produced by the candidate.

No.	Product to be Evaluated	Expected Outcome	Allocated Marks	Candidate Score	Comments
1	Postman collection	Collection Practical_Test_[YourName] exists and contains all requests	1		

2	Request naming	Requests are named clearly (e.g. Task3_POST_Create_Post)	1		
3	Response evidence	Responses for GET, POST, PUT, PATCH and DELETE show status code, time and body	1		
4	Test scripts	Status code and response time tests are saved in the requests	1		
5	Collection Runner summary	Run summary is available and shows the tests passed	1		
	TOTAL PRODUCT MARKS		**5**		

C. FINAL ASSESSMENT RECORD

Section	Score
Practical Observation Score	_____ / 30
Product Checklist Score	_____ / 5

Important: The Product Checklist score is recorded separately and is not added to the 30 practical observation marks.
