

THE ABERDARE TECHNICAL COLLEGE

LEARNING PLAN – COMPUTER OPERATIONS

1. INSTITUTIONAL DETAILS

Item	Details
Module	Module 1
Unit of Competence	Computer Operations
Unit Code	0611 351 02A
Trainer	JAMES NDIRANGU
Competence Level	Level 5
Institution	THE ABERDARE TECHNICAL COLLEGE
Number of Learners	1
Date of Preparation	04/09/2026
Duration	12 Weeks
Training Approach	Demonstration, guided practice, discussion, individual practical exercises and assessment

--	--

SKILL OR JOB TASK
Perform computer operations by processing word documents, manipulating spreadsheets, maintaining computerized databases, preparing presentations, manipulating graphic applications, performing document production, and participating in online and mobile collaboration.

2. BENCHMARK OR CRITERIA TO BE USED
<u>1. Process computerized word document</u>
<i>1.1 Ergonomics risk factors observed as per work place procedures</i>
<i>1.2 Word document is created as per work requirements</i>
<i>1.3 Tables are created and manipulated as per work requirements</i>
<i>1.4 Mail merging is performed as per work requirements</i>
<i>1.5 Word processing Objects are inserted as per user requirements</i>
<i>1.6 List of figures and table of content are generated as per user requirements</i>
<i>1.7 Computerized Word documents are printed as per workplace procedure.</i>
<u>2. Manipulate computerized spreadsheets</u>
<i>2.1 Spreadsheet workbook is created as per work requirements</i>
<i>2.2 Cell referencing is performed as per task requirements</i>
<i>2.3 Formula and functions are applied as per work requirements</i>

<i>2.4 Charts are generated as per work requirements</i>
<u>3. Maintain computerized database</u>
<i>3.1 Computerized database user requirements are collected as per work requirements.</i>
<i>3.2 Computerized database schemas are designed as per task requirements.</i>
<i>3.3 Creation of Computerized database objects as per task requirements.</i>
<i>3.4 Data manipulation is performed as per task requirements.</i>
<u>4. Prepare Power point presentation</u>
<i>4.1 PowerPoint Presentation requirements are collected as per work requirements</i>
<i>4.2 PowerPoint slides are created as per work requirement</i>
<i>4.3 Presentation views are exhibited as per work requirements.</i>
<i>4.4 Animations and transitions are performed as per work requirements</i>
<i>4.5 PowerPoint slides are manipulated as per work requirements</i>
<i>4.6 PowerPoint slides are printed as per work requirements</i>
<u>5. Manipulate graphic application</u>
<i>5.1 Identifying graphic design requirements</i>
<i>5.2 Graphic design created as per task requirements</i>
<i>5.3 Graphic design published as per the task requirements</i>
<u>6. Perform document production</u>
<i>6.1 Document is printed as per user specifications</i>
<i>6.2 Documents are scanned as per user specifications</i>
<i>6.3 Documents are duplicated as per user specifications</i>
<u>7. Perform Online Collaboration</u>
<i>7.1 Identification of Online collaboration tools as per the task requirements</i>
<i>7.2 Prepare online collaboration as per the task requirements.</i>

7.3 Apply online collaborative tools as per the task requirements.

7.4 Demonstrating Mobile collaborations as per task requirements

3. LEARNING PLAN

MAIN LEARNING OUTCOME 1: PROCESS COMPUTERIZED WORD DOCUMENT

WEEK 1 – SESSIONS 1 AND 2

Week	Main Learning Outcome	Session Title / Subtopics	Learning Outcome	Trainer Activities	Trainee Activities	Resources And referenes	Assessment	Reflections and Dates
		Session 1: Ergonomics and Introduction to Word Processing Subtopics: 1.1 Ergonomics risk factors; 1.2.1 Introduction to word document; 1.2.2 Types of word processors	By the end of this session the trainee should be able to; 1.Identify common ergonomics risk factors in a computer workstation. 2. Explain the importance of proper ergonomics. 3. Identify	1. Trainer explains common ergonomics risk factors and demonstrates a correct workstation arrangement. 2. Trainer asks questions about effects of poor ergonomics. 3. Trainer introduces word processing and explains types of word	1. Trainee identifies ergonomics risk factors and observes the correct workstation arrangement. 2. Trainee responds to questions on effects of poor ergonomics. 3. Trainee listens to the introduction and identifies different word processors. 4. Trainee distinguishes between the different types of word processors.	Computer, projector,	Oral questions observation and practical identification	

1	Process computer ized word document		common word processors. 4. Differentiate between major types of word processors.	processors. 4. Trainer asks the trainee to distinguish between different word processors.		MS Word/LibreOffice Writer, ergonomic workstation		
1	Process computer ized word	Session 2: Creating, Editing and Formatting Word Documents Subtopics: 1.2.3 Creating word document; 1.2.4 Editing and formatting word document; 1.2.5 Text editing; 1.2.5.1 Text editing; 1.2.5.2 Paragraph editing; 1.2.5.3	1. Create a new word document. 2. Apply text editing features. 3. Apply paragraph editing features. 4. Edit a complete word document.	1. Trainer demonstrates how to create and save a word document. 2. Trainer demonstrates text editing operations. 3. Trainer demonstrates paragraph editing operations. 4. Trainer provides a document-editing task and guides the trainee.	1. Trainee creates and saves a new word document. 2. Trainee applies text editing operations. 3. Trainee applies paragraph editing operations. 4. Trainee edits the provided document according to instructions.	Computer, word processor, sample documents <i>Ennis, R. L., Griesmer, J. H., Hong, S. J., Karnaugh, M., Kastner,</i>	Practical exercise and observation	_____

	document	Document editing				<i>J. K., Klein, D. A., ... & Van Woerkom, H. M. (1986). A continuous real-time expert system for computer operations. IBM Journal of Research and Development , 30(1), 14-28.</i>		
--	----------	------------------	--	--	--	---	--	--

WEEK 2 – SESSIONS 3 AND 4

Week	Main Learning Outcome	Session Title / Subtopics	Learning Outcome	Trainer Activities	Trainee Activities	Resources and references	Assessment	Reflections and Dates
2	Process computerized word document	Session 3: Word Document Formatting Subtopics: 1.2.6 Word document formatting features; 1.2.6.1 Text formatting; 1.2.6.2 Paragraph formatting; 1.2.6.3 Document formatting	By the end of this session the trainee should be able to; 1. Identify word formatting features. 2. Apply text formatting. 3. Apply paragraph formatting. 4. Format an entire document according to given specifications.	1. Trainer demonstrates common formatting features. 2. Trainer demonstrates font type, size, style and effects. 3. Trainer demonstrates paragraph alignment, indentation and spacing. 4. Trainer provides formatting specifications for a document.	1. Trainee identifies the demonstrated formatting features. 2. Trainee applies the specified text formatting. 3. Trainee applies the specified paragraph formatting. 4. Trainee formats the document according to the given specifications.	Computer, word processor, projector, sample document	Practical formatting task	
		Session 4: Enhancing Word-Processing Productivity Subtopics: 1.2.7.1 Set basic	1. Identify basic word-processing preferences. 2. Configure basic application options. 3.	1. Trainer demonstrates basic application	1. Trainee identifies the available preferences. 2. Trainee configures	Computer, word processor, projector,	Practical observation and oral questions	

2	Process computerized word document	options/preferences; 1.2.7.2 Help resources; 1.2.7.3 Magnification/zoom; 1.2.7.4 Display/hide built-in toolbar	Use help resources to solve simple problems. 4. Apply zoom and toolbar display options.	preferences. 2. Trainer guides the trainee in configuring selected options. 3. Trainer demonstrates how to access help resources. 4. Trainer demonstrates zoom and toolbar display/hide functions.	the selected application options. 3. Trainee uses help resources to find answers to assigned questions. 4. Trainee applies zoom and toolbar display/hide functions.	internet/help resources curriculum OS		
---	------------------------------------	---	--	--	--	--	--	--

WEEK 3 – SESSIONS 5 AND 6

Week	Main Learning Outcome	Session Title / Subtopics	Learning Outcome	Trainer Activities	Trainee Activities	Resources and references	Assessment	Reflections and Dates
------	-----------------------	---------------------------	------------------	--------------------	--------------------	--------------------------	------------	-----------------------

3	Process computerized word document	Session 5: Creation and Manipulation of Tables Subtopics: 1.3 Creation and manipulation of tables; 1.3.1 Inserting tables; 1.3.2 Working with tables	1. Identify the uses of tables in word documents. 2. Create tables using appropriate methods. 3. Manipulate rows and columns. 4. Format tables according to document requirements.	1. Trainer explains applications of tables in documents. 2. Trainer demonstrates how to insert tables. 3. Trainer demonstrates manipulation of rows, columns and cells. 4. Trainer demonstrates table formatting and gives a practical task.	1. Trainee identifies appropriate uses of tables. 2. Trainee inserts tables using the demonstrated methods. 3. Trainee manipulates rows, columns and cells. 4. Trainee formats tables and completes the practical task.	Computer, word processor, sample data	Practical table creation task	
3		Session 6: Mail Merge Subtopics: 1.4 Mail merge; 1.4.1 Mail merge preparation; 1.4.1 Mail merge output	1. Explain the purpose of mail merge. 2. Prepare a mail merge document and data source. 3. Apply mail merge fields. 4. Generate mail merge output.	1. Trainer explains the purpose and components of mail merge. 2. Trainer demonstrates preparation of the main document and data source. 3. Trainer demonstrates	1. Trainee explains the purpose of mail merge. 2. Trainee prepares the main document and data source. 3. Trainee inserts the appropriate merge fields. 4. Trainee previews and	Computer, word processor, sample recipient data	Individual mail merge practical	

	Process computerized word document			insertion of merge fields. 4. Trainer demonstrates previewing and generating the final output.	generates the mail merge output.			
--	------------------------------------	--	--	--	----------------------------------	--	--	--

WEEK 4 – SESSIONS 7 AND 8

Week	Main Learning Outcome	Session Title / Subtopics	Learning Outcome	Trainer Activities	Trainee Activities	Resources and references	Assessment	Reflection Dates
		Session 7: Word Processing Objects and Automatic Lists	By the end of this session the trainee should be able to;	1. Trainer demonstrates insertion of pictures, shapes, tables and charts. 2. Trainer	1. Trainee inserts pictures, shapes, tables and charts. 2. Trainee resizes,	Computer, word processor, sample	Practical document production task	

4	Process computerized word document	Subtopics: 1.5 Pictures; 1.5.2 Shapes; 1.5.3 Tables; 1.5.4 Charts; 1.6 List of figures; 1.6.2 Table of contents	1. Insert pictures, shapes, tables and charts. 2. Edit inserted objects. 3. Generate a list of figures. 4. Generate a table of contents.	demonstrates object resizing, positioning and editing. 3. Trainer demonstrates use of captions and generation of a list of figures. 4. Trainer demonstrates heading styles and automatic table of contents generation.	positions and edits the objects. 3. Trainee applies captions and generates a list of figures. 4. Trainee applies heading styles and generates a table of contents.	document, images		
4	Process computerized word document	Session 8: Printing Word Documents Subtopics: 1.7 Printing computerized word document; 1.7.1 Print setup; 1.7.2 Printing	1. Identify important print settings. 2. Configure page and printer settings. 3. Preview a document before printing. 4. Print a correctly formatted document.	1. Trainer explains important print settings. 2. Trainer demonstrates page setup and printer selection. 3. Trainer demonstrates print preview. 4. Trainer demonstrates printing and provides an individual printing task.	1. Trainee identifies important print settings. 2. Trainee configures the required settings. 3. Trainee previews the document before printing. 4. Trainee prints the document according to the specifications.	Computer, printer, word processor, paper	Practical assessment / CAT 1	

MAIN LEARNING OUTCOME 2: MANIPULATE COMPUTERIZED SPREADSHEET

WEEK 5 – SESSIONS 9 AND 10

Week	Main Learning Outcome	Session Title / Subtopics	Learning Outcome	Trainer Activities	Trainee Activities	Resources and references	Assessment	Reflections a
5	Manipulate computerized spreadsheet	Session 9: Spreadsheet Concepts and Workbook Creation Subtopics: 2.1.1 Spreadsheet concepts; 2.1.2 Elements of spreadsheet window; worksheet; workbook; rows; columns; cells	By the end of this session the trainee should be able to; 1. Define spreadsheet concepts. 2. Identify elements of a spreadsheet window. 3. Differentiate between a worksheet and	1. Trainer explains spreadsheet concepts. 2. Trainer demonstrates the spreadsheet window and its elements. 3. Trainer asks the trainee to distinguish between worksheets and	1. Trainee defines the spreadsheet concepts. 2. Trainee identifies elements of the spreadsheet window. 3. Trainee differentiates between worksheets and workbooks. 4. Trainee creates	Computer, MS Excel/LibreOffice Calc, projector	Oral questions and practical task	

			workbook. 4. Create a spreadsheet workbook.	workbooks. 4. Trainer demonstrates creation and saving of a workbook.	and saves a workbook.			
5	Manipulate computerized spreadsheet	Session 10: Cell Referencing and Worksheet Editing Subtopics: 2.2.1 Relative, absolute and mixed referencing; 2.2.2 Worksheet editing; inserting/removing rows and columns; row height and column width; inserting, renaming, moving, copying and deleting worksheets	1. Explain cell referencing. 2. Differentiate relative, absolute and mixed references. 3. Apply cell references in formulas. 4. Manipulate worksheets by inserting, renaming, moving, copying and deleting them.	1. Trainer explains cell referencing. 2. Trainer demonstrates the three types of cell references. 3. Trainer demonstrates use of references in formulas. 4. Trainer demonstrates worksheet editing operations.	1. Trainee explains cell referencing. 2. Trainee differentiates relative, absolute and mixed references. 3. Trainee applies the different references in formulas. 4. Trainee performs the demonstrated worksheet editing operations.	Computer, spreadsheet application, sample workbook	Practical exercise	

WEEK 6 – SESSIONS 11 AND 12

Week	Main Learning Outcome	Session Title / Subtopics	Learning Outcome	Trainer Activities	Trainee Activities	Resources and references	Assessment	Reflection and Da
6	Manipulate computerized spreadsheet	Session 11: Data Entry and Manipulation Subtopics: 2.2.3.1 Data entry; 2.2.3.2 Types of data	By the end of this session the trainee should be able to; 1. Identify common spreadsheet data types. 2. Enter data accurately. 3. Differentiate text, numeric, date and other data types. 4. Manipulate spreadsheet data	1. Trainer explains common spreadsheet data types. 2. Trainer demonstrates accurate data entry. 3. Trainer demonstrates how different data types behave in cells. 4. Trainer provides data manipulation exercises.	1. Trainee identifies common spreadsheet data types. 2. Trainee enters data accurately. 3. Trainee differentiates the various data types. 4. Trainee manipulates the spreadsheet data according to the exercise.	Computer, spreadsheet application, sample datasets	Practical data entry exercise	

			according to requirements.					
6	Manipulate computerized spreadsheet	Session 12: Formulas and Functions Subtopics: 2.3.1.1 Formula and function syntax; 2.3.1.2 Arithmetic functions; 2.3.1.3 Logical functions; 2.3.1.4 Lookup functions	1. Explain formula and function syntax. 2. Construct spreadsheet formulas. 3. Apply arithmetic and logical functions. 4. Apply lookup functions to retrieve data.	1. Trainer explains formula and function syntax. 2. Trainer demonstrates construction of formulas. 3. Trainer demonstrates arithmetic and logical functions. 4. Trainer demonstrates lookup functions using sample data.	1. Trainee explains formula and function syntax. 2. Trainee constructs formulas. 3. Trainee applies arithmetic and logical functions. 4. Trainee applies lookup functions to retrieve information.	Computer, spreadsheet software, sample data	Practical formula/function exercise	

WEEK 7 – SESSIONS 13 AND 14

Week	Main Learning Outcome	Session Title / Subtopics	Learning Outcome	Trainer Activities	Trainee Activities	Resources and references	Assessment	Reflection
7	Manipulate computerized spreadsheet	Session 13: Spreadsheet Formatting Subtopics: 2.3.2.1 Font styles; 2.3.2.2 Alignment; 2.3.2.3 Borders and shading; 2.3.2.4 Header and footer	By the end of this session the trainee should be able to; 1. Identify spreadsheet formatting features. 2. Apply font styles and alignment. 3. Apply borders and shading. 4. Insert headers and footers.	1. Trainer identifies and demonstrates formatting features. 2. Trainer demonstrates font and alignment formatting. 3. Trainer demonstrates borders and shading. 4. Trainer demonstrates insertion of headers and footers.	1. Trainee identifies the formatting features. 2. Trainee applies font and alignment formatting. 3. Trainee applies borders and shading. 4. Trainee inserts appropriate headers and footers.	Computer, spreadsheet software, sample workbook	Practical formatting exercise	
		Session 14: Chart Generation Subtopics: 2.4.1.1 Types of charts; 2.4.1.2 Insert charts; 2.4.1.3	1. Identify common chart types. 2. Select appropriate charts for given data. 3. Create charts from spreadsheet data. 4.	1. Trainer explains common chart types. 2. Trainer provides datasets and asks the trainee to select appropriate charts. 3. Trainer demonstrates	1. Trainee identifies common chart types. 2. Trainee selects appropriate charts for the given datasets. 3. Trainee creates charts from the data. 4.	Computer, spreadsheet application, datasets, projector	Chart-generation practical	

7	Manipulate computerized spreadsheet	Labelling and editing charts	Edit and label charts appropriately.	chart insertion. 4. Trainer demonstrates chart labelling and editing.	Trainee labels and edits the charts appropriately.			
---	-------------------------------------	------------------------------	---	---	--	--	--	--

WEEK 8 – SESSIONS 15 AND 16

Week	Main Learning Outcome	Session Title / Subtopics	Learning Outcome	Trainer Activities	Trainee Activities	Resources and references	Assessment	Reflections and Dates
8	Manipulate computerized spreadsheet	Session 15: Spreadsheet Printing Subtopics: 2.4.1.4 Workbook printing; 2.4.1.5 Print setup; 2.4.1.6 Printing	By the end of this session the trainee should be able to; 1. Identify spreadsheet printing options. 2. Configure print settings. 3. Preview worksheets before printing. 4. Print a spreadsheet workbook.	1. Trainer explains spreadsheet print options. 2. Trainer demonstrates print setup. 3. Trainer demonstrates print preview and page arrangement. 4. Trainer demonstrates printing a workbook.	1. Trainee identifies spreadsheet printing options. 2. Trainee configures print settings. 3. Trainee previews the worksheet. 4. Trainee prints the workbook according to specifications.	Computer, spreadsheet software, printer, paper	Practical printing task	
		Session 16: Integrated Spreadsheet Practical Subtopics: Workbook creation, cell	1. Apply spreadsheet creation skills. 2. Analyse a given	1. Trainer provides an integrated spreadsheet	1. Trainee applies spreadsheet creation skills to the task. 2.	Computer, spreadsheet software, printer,	CAT 2 / Practical assessment	

8	Manipulate computerized spreadsheet	referencing, data entry, formulas/functions, formatting, charts and printing	dataset. 3. Construct formulas and functions. 4. Create a formatted workbook and chart. 5. Evaluate the final workbook against given requirements.	task. 2. Trainer asks the trainee to analyse the given requirements and dataset. 3. Trainer guides the trainee in developing formulas and functions. 4. Trainer observes workbook and chart creation. 5. Trainer guides the trainee in checking the completed workbook.	Trainee analyses the requirements and dataset. 3. Trainee constructs the required formulas and functions. 4. Trainee creates and formats the workbook and chart. 5. Trainee evaluates the completed workbook against the requirements.	practical task sheet		
---	-------------------------------------	--	--	---	--	----------------------	--	--

MAIN LEARNING OUTCOME 3: MAINTAIN COMPUTERIZED DATABASE

WEEK 9 – SESSIONS 17 AND 18

Week	Main Learning Outcome	Session Title / Subtopics	Learning Outcome	Trainer Activities	Trainee Activities	Resources and references	Assessment	Reflections and Dates
9	Maintain computerized database	Session 17: Database Concepts and User Requirements Subtopics: 3.1.1 Introduction to database; key concepts; database organization; database relationships; database operations; 3.1.2 Collection of user requirements	By the end of this session the trainee should be able to; 1. Define database concepts. 2. Explain database organization and relationships. 3. Describe common database operations. 4. Collect database	1. Trainer introduces database concepts. 2. Trainer explains database organization and relationships. 3. Trainer demonstrates common database operations. 4. Trainer provides a scenario and guides the trainee in	1. Trainee defines database concepts. 2. Trainee explains database organization and relationships. 3. Trainee describes common database operations. 4. Trainee collects user requirements from the given scenario.	Computer, MS Access/LibreOffice Base, sample databases, projector	Oral questions and requirements collection exercise	

			user requirements.	collecting requirements.				
9	Maintain computerized database	Session 18: Database Schema Design Subtopics: 3.2 Design computerized database schema; 3.2.1 Creating database models; 3.2.1.1 ERD models; 3.2.1.2 Relational models	1. Explain database schema. 2. Identify entities, attributes and relationships. 3. Create an ERD model. 4. Convert an ERD into a basic relational model.	1. Trainer explains database schema design. 2. Trainer demonstrates identification of entities, attributes and relationships. 3. Trainer demonstrates creation of an ERD. 4. Trainer demonstrates conversion of the ERD into a relational model.	1. Trainee explains database schema design. 2. Trainee identifies entities, attributes and relationships. 3. Trainee creates an ERD from the given requirements. 4. Trainee converts the ERD into a relational model.	Computer, database software, draw.io/ERD tool, projector	ERD and relational model practical	

WEEK 10 – SESSIONS 19 AND 20

Week	Main Learning Outcome	Session Title / Subtopics	Learning Outcome	Trainer Activities	Trainee Activities	Resources and references	Assessment	Reflections and Dates
		Session 19: Database Objects Creation Subtopics: 3.3.1 Tables; records; fields; keys; forms; queries; reports	By the end of this session the trainee should be able to; 1. Identify major database objects.	1. Trainer identifies and explains database objects. 2. Trainer demonstrates the difference	1. Trainee identifies major database objects. 2. Trainee differentiates tables, records, fields and keys.	Computer,	Practical database creation	

10	Maintain computerized database		2. Differentiate tables, records, fields and keys. 3. Create tables and define fields and keys. 4. Create forms, queries and reports.	between tables, records, fields and keys. 3. Trainer demonstrates creation of tables, fields and keys. 4. Trainer demonstrates creation of forms, queries and reports.	3. Trainee creates tables and defines fields and keys. 4. Trainee creates forms, queries and reports.	database software, sample data		
10	Maintain computerized database	Session 20: Database Data Manipulation and Printing Subtopics: 3.4.1 Inserting records; 3.4.2 Retrieving records; 3.4.3 Deleting records; 3.4.4 Updating records; 3.4.5 Printing tables, forms, queries and reports	1. Enter database records. 2. Retrieve required records. 3. Update and delete records appropriately. 4. Print tables, forms, queries and reports.	1. Trainer demonstrates record entry. 2. Trainer demonstrates record retrieval using appropriate methods. 3. Trainer demonstrates updating and deleting records. 4. Trainer demonstrates	1. Trainee enters records into the database. 2. Trainee retrieves the required records. 3. Trainee updates and deletes records according to instructions. 4. Trainee prints the required tables, forms, queries and reports.	Computer, database software, printer,	Practical database manipulation	_____

				printing database objects.		sample database		
--	--	--	--	----------------------------	--	-----------------	--	--

MAIN LEARNING OUTCOME 4: PREPARE POWERPOINT PRESENTATION

WEEK 11 – SESSIONS 21 AND 22

Week	Main Learning Outcome	Session Title / Subtopics	Learning Outcome	Trainer Activities	Trainee Activities	Resources and references	Assessment	Reflections and
		Session 21: PowerPoint Requirements, Slides and Presentation Views Subtopics: 4.1.1 Definition of terms; 4.1.2 Presentation requirements; 4.1.3 Types of presentation software; 4.1.4	By the end of this session the trainee should be able to; 1. Define common presentation terms. 2. Identify presentation	1. Trainer defines common presentation terms. 2. Trainer identifies presentation requirements and types of software. 3. Trainer demonstrates	1. Trainee defines common presentation terms. 2. Trainee identifies presentation requirements and software. 3. Trainee selects appropriate slide	Computer, MS PowerPoint/Impress,	Practical PowerPoint task	

11	Prepare PowerPoint presentation	Elements of presentation window; 4.2.1 Types of presentation layout; 4.2.2 Factors to consider when designing presentation layout; 4.2.3 Design a PowerPoint presentation; 4.2.4 Create a PowerPoint presentation; 4.2.5 Save a PowerPoint presentation; 4.3 Exhibition of presentation views; slide views; working with presentations; switching between open presentations	requirements and software. 3. Select appropriate slide layouts. 4. Design and create a PowerPoint presentation. 5. Demonstrate different presentation views.	selection of appropriate slide layouts. 4. Trainer demonstrates designing, creating and saving a presentation. 5. Trainer demonstrates different slide views and switching between presentations.	layouts. 4. Trainee designs, creates and saves a presentation. 5. Trainee demonstrates different slide views and switches between open presentations.	projector		
		Session 22: Animation, Transitions and Slide Manipulation Subtopics: 4.4.1 Slide animation;	1. Apply animation and transition effects. 2. Add and format text and data. 3.	1. Trainer demonstrates slide animation and transitions. 2. Trainer demonstrates	1. Trainee applies appropriate animation and transition effects. 2.	Computer,	Practical observation	_____

11	Prepare PowerPoint presentation	4.4.2 Slide transition; 4.5.1 Adding data/text; 4.5.2 Formatting data/text; 4.5.3 Move/copy/delete slide; 4.5.4 Header and footer; 4.5.5 Tables and charts	Manipulate slides by moving, copying and deleting them. 4. Insert headers, footers, tables and charts.	adding and formatting text and data. 3. Trainer demonstrates moving, copying and deleting slides. 4. Trainer demonstrates insertion of headers, footers, tables and charts.	Trainee adds and formats text and data. 3. Trainee moves, copies and deletes slides. 4. Trainee inserts headers, footers, tables and charts.	PowerPoint, projector, sample presentation		
----	---------------------------------	---	---	--	--	--	--	--

MAIN LEARNING OUTCOME 5: MANIPULATE GRAPHIC APPLICATION

WEEK 12 – SESSIONS 23 AND 24

Week	Main Learning Outcome	Session Title / Subtopics	Learning Outcome	Trainer Activities	Trainee Activities	Resources and references	Assessment	Reflections and D
12	Manipulate graphic application	Session 23: Graphic Design Requirements and Publication Creation Subtopics: 5.1.1 Definition of terms; 5.1.2 Graphic application requirements; 5.1.3 Types of graphic application software; 5.1.4 Publication designs – templates, banners, booklets, brochures, flyers,	By the end of this session the trainee should be able to; 1. Define common graphic design terms. 2. Identify graphic application requirements and software. 3. Differentiate common publication types. 4. Select an appropriate publication type. 5. Create a publication using	1. Trainer explains common graphic design terms. 2. Trainer identifies graphic application requirements and software. 3. Trainer displays and explains different publication designs. 4. Trainer guides the trainee in selecting an appropriate publication type. 5. Trainer demonstrates page setup, rulers,	1. Trainee defines common graphic design terms. 2. Trainee identifies graphic application requirements and software. 3. Trainee differentiates the publication types. 4. Trainee selects an appropriate publication type. 5. Trainee creates a publication using appropriate page settings, rulers, guides and views.	Computer, graphic application software, projector,	Practical graphic design task	

		posters, cards, certificates and magazines; 5.1.5 Elements of graphic application window; 5.2.1 Publication type, page setup, ruler/guides and page views	appropriate page settings.	guides and page views.		sample publications		
12	Manipulate graphic application	Session 24: Publication Content, Formatting, Graphics and Printing Subtopics: 5.2.2 Add content; 5.2.3 Edit content; 5.2.4 Format text and paragraphs; 5.2.5 Columns, borders/shading, headers/footers, background, watermarks,	1. Add, edit and format content in a publication. 2. Apply page formatting features. 3. Manipulate textboxes, tables, shapes and pictures. 4. Prepare and print a publication. 5. Identify document production and	1. Trainer demonstrates adding, editing and formatting publication content. 2. Trainer demonstrates columns, borders, headers, footers, backgrounds, watermarks and orientation. 3. Trainer demonstrates insertion and manipulation of	1. Trainee adds, edits and formats publication content. 2. Trainee applies the demonstrated page formatting features. 3. Trainee inserts and manipulates textboxes, tables, shapes and pictures. 4. Trainee prepares and prints the publication. 5.	Computers, graphic software, printer, scanner,	Integrated practical assessment / CAT 3	

		orientation; 5.2.6 Textboxes, tables, shapes, pictures; PNG, JPEG, GIF; 5.3.1 Prepare publication; 5.3.2 Print setup; 5.3.3 Printing publication; 6.1– 6.3 Document production; 7.1– 7.4 Online collaboration	online collaboration tools. 6. Demonstrate basic online collaboration and mobile synchronization skills.	textboxes, tables, shapes and pictures. 4. Trainer demonstrates publication preparation and printing. 5. Trainer introduces document production and online collaboration tools. 6. Trainer demonstrates basic online collaboration, mobile applications, permissions and synchronization.	Trainee identifies document production and online collaboration tools. 6. Trainee demonstrates basic online collaboration and mobile synchronization.	internet, Microsoft Teams/Skype/Google Drive/Zoom/Google Meet/Slack, email, mobile device		
--	--	---	---	--	---	--	--	--
