

LEARNING PLAN

Institution Name	THE ABERDARE TECHNICAL COLLEGE
Department	ICT Department
Course Title	Information Communication Technology
Unit of Competency	Computer Repair and Maintenance
Unit code	
Module Title	Computer Repair
Duration	10 Weeks
Trainer Name	Mr Ndirangu
Class/Level	5

Academic Year	2026
Date of preparation	04/08/2026

Learning Plan Contents

Week	Session/Topic	Learning Outcomes By the end of this session, the trainee should be able to:	Trainer Activities	Trainee Activities	Resources/Tools	Assessment Methods	Reflection and Date
Week 1	Perform Computer Troubleshooting	• Define computer repair and maintenance correctly. • Explain the importance of computer troubleshooting accurately. <i>(Remembering & Understanding)</i>	Introduce computer repair concepts and explain troubleshooting procedures.	Listen, take notes, participate in discussions, and answer questions.	Computers, projector, charts	Oral questions, quiz	
		• Document faulty computer user complaints correctly using standard	Demonstrate proper fault documentation	Practice recording and documenting computer faults.	Fault report forms, computers	Assignment	

Week	Session/Topic	Learning Outcomes By the end of this session, the trainee should be able to:	Trainer Activities	Trainee Activities	Resources/Tools	Assessment Methods	Reflection and Date
		procedures. (Applying)	on procedures.				
Week 2	Perform Computer Troubleshooting	• Identify common computer faults and symptoms accurately. • Classify hardware and software problems correctly. (Remembering & Analyzing)	Explain common computer faults and demonstrate fault identification techniques.	Observe demonstrations and identify computer faults.	Faulty computer components	Practical observation	
		• Diagnose basic computer problems using troubleshooting techniques	Demonstrate troubleshooting	Practice diagnosing computer problems in groups.	Computers, diagnostic tools	Practical exercise	

Week	Session/Topic	Learning Outcomes By the end of this session, the trainee should be able to:	Trainer Activities	Trainee Activities	Resources/Tools	Assessment Methods	Reflection and Date
		successfully. (Applying & Evaluating)	procedures step by step.				
Week 3	Repair Faulty Components	- Identify computer repair tools correctly. - Select appropriate tools for repair tasks accurately. (Remembering & Applying)	Display repair tools and explain their functions and uses.	Observe, identify, and handle repair tools safely.	Screwdrivers, pliers, hex wrench set, torx screwdriver	Practical assessment	
		Apply safety measures and procedures during repair activities	Demonstrate workplace safety procedures	Wear PPE and practice safety procedures during practical work.	Gloves, dust coats, safety boots, fire extinguisher	Observation checklist	

Week	Session/Topic	Learning Outcomes By the end of this session, the trainee should be able to:	Trainer Activities	Trainee Activities	Resources/Tools	Assessment Methods	Reflection and Date
		consistently. (Applying)	and use of PPE.				
Week 4	Repair Faulty Components	• Differentiate classes of fires correctly. • Use fire extinguishers appropriately during emergencies. (Understanding & Applying)	Explain fire safety procedures and demonstrate use of fire extinguishers.	Participate in fire safety demonstrations and drills.	Fire extinguishers, charts	Oral questions, practical observation	
		• Explain emergency procedures and contingency	Discuss emergency response procedures	Participate in discussions and emergency response simulations.	First aid kit, emergency contacts list	Quiz	

Week	Session/Topic	Learning Outcomes By the end of this session, the trainee should be able to:	Trainer Activities	Trainee Activities	Resources/Tools	Assessment Methods	Reflection and Date
		measures correctly. (Understanding)	and first aid practices.				
Week 5	Repair Faulty Components	Disassemble computer components safely following instruction manuals. (Applying)	Demonstrate computer disassembly procedures step by step.	Practice dismantling computer components under supervision.	Computer components, tool kits	Practical test	
		Reassemble repaired or replaced computer components correctly. (Creating)	Demonstrate reassembly procedures after repair activities.	Reassemble computer components practically.	Motherboards, RAM, power supply units	Observation	

Week	Session/Topic	Learning Outcomes By the end of this session, the trainee should be able to:	Trainer Activities	Trainee Activities	Resources/Tools	Assessment Methods	Reflection and Date
Week 6	Repair Faulty Components	• Differentiate types of E-waste correctly. • Explain hazards caused by improper disposal of computer hardware. <i>(Understanding & Analyzing)</i>	Explain environmental effects of E-waste and pollution.	Participate in discussions and identify types of E-waste.	Charts, videos	Written exercise	
		• Apply proper disposal methods for faulty or obsolete computer hardware correctly. <i>(Applying)</i>	Demonstrate proper disposal techniques for	Sort and dispose faulty hardware components appropriately.	Disposal containers, obsolete hardware	Practical assessment	

Week	Session/Topic	Learning Outcomes By the end of this session, the trainee should be able to:	Trainer Activities	Trainee Activities	Resources/Tools	Assessment Methods	Reflection and Date
			computer hardware.				
Week 7	Test Computer Component Functionality	• Perform Power-On Self-Test (POST) procedures correctly. <i>(Applying)</i>	Demonstrate POST procedures on computers.	Conduct POST tests on computer systems.	Computers, POST cards	Practical exercise	
		• Explain the importance of testing repaired computer components accurately. <i>(Understanding)</i>	Explain testing procedures and their importance after repair.	Participate in discussions and answer questions.	Projector, charts	Quiz	

Week	Session/Topic	Learning Outcomes By the end of this session, the trainee should be able to:	Trainer Activities	Trainee Activities	Resources/Tools	Assessment Methods	Reflection and Date
Week 8	Test Computer Component Functionality	• Apply appropriate testing techniques on repaired or replaced components successfully. <i>(Applying)</i>	Demonstrate component testing procedures.	Test repaired computer components practically.	Diagnostic software, multimeter	Practical observation	
		• Evaluate computer test results accurately. <i>(Evaluating)</i>	Guide learners in interpreting test results.	Analyze and interpret testing outcomes.	Test reports, computers	Assignment	
Week 9	Test Computer Component Functionality	• Generate computer component functionality	Demonstrate preparation of test	Prepare and present test reports.	Report templates, computers	Report writing task	

Week	Session/Topic	Learning Outcomes By the end of this session, the trainee should be able to:	Trainer Activities	Trainee Activities	Resources/Tools	Assessment Methods	Reflection and Date
		reports correctly. (Creating)	results reports.				
	Perform Computer Maintenance	• Define computer maintenance correctly. • Explain the importance of computer maintenance accurately. (Remembering & Understanding)	Explain computer maintenance concepts and benefits.	Take notes and participate in discussions.	Projector, charts	Written exercise	
Week 10	Perform Computer Maintenance	• Differentiate types of computer maintenance correctly. •	Demonstrate preparation of	Develop maintenance schedules in groups.	Maintenance templates, computers	Assignment	

Week	Session/Topic	Learning Outcomes By the end of this session, the trainee should be able to:	Trainer Activities	Trainee Activities	Resources/Tools	Assessment Methods	Reflection and Date
		Prepare a computer maintenance schedule successfully. (Understanding & Creating)	maintenance schedules.				
		• Use computer maintenance utilities correctly. • Perform routine computer maintenance procedures successfully. (Applying)	Demonstrate use of maintenance utilities and maintenance procedures.	Perform routine computer maintenance practically.	Utility software, cleaning tools	Practical assessment	

Week	Session/Topic	Learning Outcomes By the end of this session, the trainee should be able to:	Trainer Activities	Trainee Activities	Resources/Tools	Assessment Methods	Reflection and Date
		• Prepare a computer maintenance report correctly. • Explain the importance of maintenance reports accurately. <i>(Creating & Understanding)</i>	Explain components of maintenance reports and demonstrate report writing.	Prepare and submit maintenance reports.	Report templates, computers	Final project/report
