Long Answer

Provide detailed responses to the following questions. Your answers should reflect critical thinking and professional application. Each question is worth 12 marks.

Question 11

12 total marks

Neema has recently joined a new project team at her workplace, comprising members from diverse departments. There have been significant misunderstandings regarding the determination of team roles and responsibilities. These conflicts have begun to negatively impact the team's overall performance and morale.

A Analyze Neema's situation and describe the qualities she must demonstrate to be an effective team player. Additionally, propose and explain conflict resolution strategies she could use to improve team relationships and overall performance.

Qualities

1. Good Communication → Neema should Communicate clearly and make sure she understand what other team members are saying.
2. Positive attitude → She should encourage other members and avoid spreading negativity that can lower the team's morale
3) Responsibility → Neema should perform her assigned duties properly and be accountable for her actions.
4) Patience - She should remain calm when disagreements occur instead of reacting angrily or blaming others.
5) Respect for others - She should respect people from different departments backgrounds and opinions even when they disagree.

Conflict

1 Discuss the problem openly - The team should have a meeting where members can explain the misunderstandings about their roles and responsibilities
2 Listen to each person's side - Everyone should be given an opportunity to explain their concerns without being interrupted or judged
3) Clarify roles and responsibilities - The team leader should clearly explain who is responsible for each task.
4) Find a common solution - The team should agree on a solution that is fair and helps them achieve the main project goals.
5) Follow up after the agreement - The team should after later Check whether the agreed solution is working and make changes if necessary.

Question 12

12 total marks

Maya is a junior food technologist planning her long-term career growth. She wants to balance her personal development with professional development but has noticed gaps in her technical skills regarding modern food preservation methods.

A Explain the differences between personal development and professional development within the context of Maya's career. Furthermore, discuss specific avenues for professional growth she should pursue to address her identified skill gaps and how setting goals will help her manage work priorities.

Personal development → is the improvement of a person's character, behavior, confidence, communication and other abilities that help them in everyday life and work. For example, Maya can improve her confidence, time management, communication and problem-solving skills. 2

Professional development → On the other hand, is the improvement of knowledge and skills that are directly related to one's career or occupation. In Maya's case, she need to improve her knowledge of modern food preservation methods, food safety, food processing technology and quality control. 2

Strategies

1. Attend training and workshops - Maya should attend courses on modern food preservation methods.
2. Read and research - She should regularly read food technology materials, manuals and current information about new preservation methods.
3. Further her education - She can take additional courses or certifications related to food technology and food safety.
4. Practice the skills learned → She should apply the new preservation techniques in her daily work under proper supervision.

How goal setting can help Maya manage work priorities.

- Setting goals helps Maya know what she wants to achieve and what should be done first.
- For example, she can set a goal of completing a food preservation course within six months.
- Goals also help Maya manage time, avoid unnecessary activities, monitor her progress and stay motivated.
- Also she can review her goals regularly and change them when necessary. 6

Question 13

12 total marks

At Kims LTD, a manager named Michael has noticed a high rate of sick leave requests. Investigations suggest these are linked to lifestyle-related issues and high workplace stress, which is currently affecting the department's productivity and meeting of project deadlines.

A Discuss the healthy lifestyle practices that employees at Kims LTD should adopt to improve their health. Additionally, explain how these unhealthy lifestyle choices and high stress levels directly impact the department's performance and productivity.

Healthy Lifestyle Practices Employees Should Adopt

1 Eat a balanced diet - Employees should eat foods containing carbohydrates, Proteins, Vitamins, minerals and enough fibre.

2) Exercise regularly - Physical activities such as walking, jogging or exercising help keep the body fit, reduce stress and Prevent some lifestyle diseases.

3) Manage stress properly → Employees should take breaks, relax, talk to Someone they trust and use healthy ways of dealing with Pressure Instead of ignoring stress.

4) Avoid smoking and excessive alcohol - These habits can damage health and may lead to disease and frequent absenteeism.

5) Maintain good Personal hygiene - Regular bathing, handwashing and keeping a Clean working environment can help Prevent infections and illness.

6) Drink enough water - Taking enough water helps the body function Properly and Prevents dehydration, which can cause tiredness and headache.

6

How Unhealthy Lifestyles and Stress Affect Performance

1 Poor teamwork - Stress can make workers impatient or irritable, leading to disagreements among colleagues.

2) Poor Concentration: Stress, Lack of sleep and Poor nutrition can make it difficult to concentrate, increasing mistakes.

3) Low Productivity - A tired of stressed employee may work more slowly and accomplish less work

4) Failure to meet deadlines - When employees are absent or unable to work effectively, Projects may take Longer to Complete.

5) Low Morale → Constant pressure and illness can make employees lose motivation and interest in their work.

5

Question 14

12 total marks

A project team is facing a recurring issue where critical deadlines for food safety reports are frequently missed. This has caused delays in product shipping and has damaged relationships with external vendors. The team currently lacks a structured way to handle urgent vs. non-urgent tasks.

A Identify the likely causes of the missed deadlines in this scenario. Outline the specific steps the team should take to solve this problem and discuss how critical thinking can be applied to prevent future delays.

Likely cause of the missed deadlines

1) Poor time Management - Team members may not be planning their work properly or may leave important reports until the last minute.
2) Lack of clear responsibilities - If members do not know exactly who is responsible for preparing, checking and submitting the report, work may be delayed.
3) Lack of proper follow up - Nobody may be checking the progress of the report before the deadline.
4) Poor communication - Important information may not reach the right person on time, causing unnecessary delays.

4

Steps the team should take to solve the problems

1) Identify the main cause of the delays - The team should discuss previous missed deadlines and find out where the problem usually occurs.
2) Monitor progress - The team leader should regularly check whether each person has completed their part and take action early if someone is behind.
3) Improve communication - Team members should update each other about progress and immediately report any problem that may cause a delay.
4) Set clear responsibilities - One person should be responsible for collecting information, another for checking it, and another for submitting the final report.

4

How critical thinking can prevent future delays

Critical thinking will help the team look at the real cause of the problem before deciding what to do.
For example, instead of blaming a worker for late submission, the team can ask whether the person had enough information, time and resource.
Also, the team can compare different solutions and choose the one that is most practical.

Question 15 12 marks

Differentiate between a 'Personal Vision' and a 'Personal Mission' as they apply to a food technology professional. Furthermore, evaluate the organizational benefits for Aberdare Technical Training Institute when its students and staff strictly adhere to a professional Code of Conduct.

Personal Vision - This is what a person wants to become or achieve in the future.

Personal Mission - This is what a person does and how they intend to achieve their vision.

Vision is where I want to be, while mission is what I will do to get there.

4

Benefits of following a Professional Code of Conduct

1) Promotes honesty and integrity - The code discourages cheating, dishonesty, corruption and other unacceptable behaviour.
2) Creates a good learning environment - When everyone follows the rules, the institute becomes safer, more organized and suitable for learning.
3) Prepares student for employment - following a code of conduct helps students develop work habits that employers expect, such as punctuality, responsibility, respect and confidentiality
4) Encourages professionalism - It teaches people to behave responsibly and respectfully in the institute and later in the workplace.
5) Builds trust - When students and staff are honest and responsible, they gain the trust of colleagues, learners and employers
6) Protects the reputation of the institution - Good conduct by students and staff creates a positive image of the institute to employers and the community.
7) Improves relationships - Respectful communication and proper behaviour reduce unnecessary conflicts between students and staff.
8) Promotes discipline - Students and staff understand the behaviour expected from them and are more likely to follow the rules.
