

ABERDARE TECHNICAL COLLEGE
INFORMATION COMMUNICATION TECHNOLOGY

MODULE 1

UNIT:COMPUTER OPERATIONS

UNIT CODE: 0611 351 02A

PRACTICAL 2

ELEMENT 1:PROCESS COMPUTERIZED WORD DOCUMENT

TIME 3 HOURS

TOTAL 50 MARKS

Instructions:

- ✓ *Using Microsoft Word (or an equivalent word processor), complete the following tasks in order.*
- ✓ *Save your work regularly using an appropriate filename as instructed by your invigilator.*
- ✓ *You have been provided with a computer with a word processor on a working desktop computer.*
- ✓ *Use it to complete the tasks below and regularly save your work.*

TASKS

Task 1

List and briefly explain three ergonomic risk factors associated with prolonged computer use, and describe one corrective measure for each.

Task 2

Open your word processor and create a new blank document. Save it as PracticalTest_[YourName].docx in your designated folder.

Task 3

Set the following basic preferences/options before typing:

- Default font: Times New Roman, size 12
- Page size: A4
- Page margins: Top and Bottom 2.5cm, Left and Right 2cm

Task 4

Type the following paragraph exactly as shown into your document:

"Word processing is the use of a computer and specialized software to create, edit, format, store, and print documents. It has replaced typewriters in most modern offices due to its flexibility and efficiency."

Task 5

Using the paragraph typed in Task 4, perform the following editing actions:

- Copy the paragraph and paste it directly below the original (so it appears twice)
- In the second copy, use Find and Replace to replace every instance of the word "computer" with "PC"
- Undo the Find and Replace action, then redo it

Task 6

Select the second paragraph and:

- Move it so that it appears *above* the first paragraph (using cut and paste)
- Delete any one sentence from the moved paragraph

Task 7

Apply the following formatting to the first paragraph only:

- Make the text **bold**
- Change the font color to blue
- Change the font size to 14
- Apply italics to the first sentence only

Task 8

Add a superscript "1" immediately after the word "documents" and a subscript "2" immediately after the word "typewriters" in the text.

Task 9

Apply the following paragraph formatting to the second paragraph:

- Line spacing: 1.5
- Text alignment: Justify
- First-line indent: 1.27cm
- Add a border around the paragraph

Task 10

Convert the second paragraph into a **bulleted list** by splitting its sentences into three separate bullet points.

Task 11

Insert a **page break** after your current content, then on the new page:

- Insert a header with your full name
- Insert a footer with automatic page numbering
- Change the page orientation of this new page section to Landscape (using a section break)

Task 12

Apply a **Heading 1** style to the title "Practical Test Document" (type this title at the very top of your document) and a **Heading 2** style to two subheadings of your choice within the document.

Task 13

Demonstrate the following productivity features:

- Zoom the document view to 150%, then return it to 100%
- Hide the ribbon/toolbar, then display it again
- Open the Help feature and search for "page numbers"; take a screenshot of the results and paste it at the bottom of your document

Task 14

Insert a table with 4 columns and 5 rows below your existing content. Populate it with the following student record data:

Name	Age	Course	Grade
Asha	21	IT	A
Brian	22	Business	B
Carla	20	IT	A

Task 15

Modify the table as follows:

- Insert one additional row at the bottom and add a new student's details
- Insert one additional column on the right titled "Remarks" and fill it in for each row
- Merge the cells in the header row of the "Name" and "Age" columns into a single cell labeled "Student Info"
- Apply a table style/theme of your choice with shading on the header row

Task 16

Prepare a mail merge:

- Create a short main document (a simple invitation or notice letter) with placeholders for <<Name>> and <<Course>>
- Create a data source (recipient list) with at least three records containing Name and Course fields
- Complete the mail merge process, merging the main document with the data source
- Generate and save the final merged output as a new document showing all three personalized letters

Task 17

Insert the following objects into your document:

- A picture (from file or online source) with text wrapping set to "Square"

- A shape (e.g., a rectangle or arrow) with a fill color of your choice
- A simple chart (e.g., a column chart) representing the following data: Sales for Jan = 100, Feb = 150, Mar = 120

Task 18

Using the headings you applied in Task 12, generate an automatic **Table of Contents** at the top of the document (before the title).

Task 19

Add captions to the picture and chart you inserted in Task 17 (label them "Figure 1" and "Figure 2"), then generate a **List of Figures** immediately after the Table of Contents.

Task 20

Open the Print Setup/Print Preview dialog for your document and configure the following without actually printing:

- Set the print range to pages 1–2 only
- Set the number of copies to 2
- Select "Print on both sides" (duplex) if available
- Take a screenshot of your print setup dialog and paste it as the final item in your document

Final Step: Save your completed document one more time, ensuring all tasks are visible and correctly applied, then submit it as instructed.

The trainer is introduction oral questions shortly.
