ABERDARE TECHNICAL COLLEGE

OBSERVATION CHECKLIST

ICT MODULE 4 – LEVEL 5

UNIT: Computer Programming Principles

UNIT CODE: 0613 451 05A

PRACTICAL 1

COMPUTER PROGRAMMING

TIME: 2 HOURS

1. Trainer and Candidate Details

Details	Information
Trainer/Assessor Name	[illegible] [illegible] James
Trainer/Assessor Number	
Candidate Name	BRIAN MAINA
Candidate Admission Number	535
Qualification	ICT Level 5
Module	Module 4
Unit Code	0613 451 05A
Date of Assessment	13/9/2024

Assessment Venue	Computer lab 210
Start Time	8:00am
End Time	10:00am

2. Cutting List

No.	Item	Quantity	Provide
1	Desktop computer or PC	1 per candidate	Institution
2	Code::Blocks with GNU GCC compiler or online C compiler	1 per candidate	Institution
3	Internet connection, if using an online compiler	As required	Institution
4	Practical question paper	1 per candidate	Institution

3. Practical Observation Checklist — 30 Marks

Question 1: Voting Eligibility — 13 Marks

No.	Practical task / observation criteria	Allocated Marks	Candidate Score	Commen
1	Includes the required header file and declares the integer variable age.	3	3	-headerfil includ
2	Prompts the user to enter their age and accepts input using scanf().	3	3	-prompted to enter -accepts
3	Applies the if...else statement correctly to determine voting eligibility.	4	4	-applied syntax co
4	Displays the correct message for both eligible and ineligible voters.	3	3	-message correct

OTAL — QUESTION 1	13	13	

on 2: Temperature Message — 17 Marks

	Practical task / observation criteria	Allocated Marks	Candidate Score	Comments
	Declares the integer variable temp, prompts the user and accepts temperature input.	3	3	-declared variable -accepts user input
	Uses the correct condition to display Freezing for temperatures below 0°C.	2	2	-Used the correct condition
	Uses the correct condition to display Cold for temperatures from 0°C to 15°C.	2	2	-correct condition used
	Uses the correct condition to display Pleasant for temperatures from 16°C to 25°C.	2	2	-correct condition used
5	Uses the correct condition to display Warm for temperatures from 26°C to 35°C.	2	2	-correct condition used.
6	Uses the final else to display Hot for temperatures above 35°C.	2	2	-used else statement
7	Uses the correct if...else if...else structure with appropriate braces and program structure.	2	2	-Used the correct if-else if statement
8	Compiles and executes the program and saves it as q2.c, or submits the code and output when using an online compiler.	2	0	-compiled -not saved
	TOTAL — QUESTION 2	17	16	

Practical Observation Summary

Assessment item	Allocated Marks	Candidate Score
Question 1: Voting Eligibility	13	13
Question 2: Temperature Message	17	16
TOTAL PRACTICAL OBSERVATION	30	29

roduct Checklist — 5 Marks

o.	Product criteria	Allocated Marks	Candidate Score	Comments
	Question 1 source code is complete and correctly saved as q1.c, or submitted online.	1	1/1	NOT saved
2	Question 1 produces the correct output for voting eligibility.	1	1	output OK
3	Question 2 source code is complete and correctly saved as q2.c, or submitted online.	1	1/1	- source code complete - NOT saved
4	Question 2 displays the correct messages for all five temperature ranges.	1	1	correct display
5	Both programs have clear prompts, readable formatting and appropriate output.	1	1	clear prompts
	TOTAL PRODUCT CHECKLIST	5	5/5	

Decision Outcome

Assessment outcome:

☑ Competent

☐ Not Yet Competent

Assessor's Name: James

Assessor's Signature: Burnett Date: 13/01/2026

Assessor's Comments

source code and syntax OK
