Instructions to the assessor

- Observe the candidate while they work. Award marks only if the candidate performs the step correctly.
- Award the full mark, or 0. Partial marks are allowed only where the Max marks column is 2 or more.
- Use the Remarks column to record evidence (screenshot label, file name, or what you saw).
- Tasks marked (Assessor check) must be verified in person when the candidate raises a hand. Do not award these marks from the screenshot alone.
- Ask the oral questions in Part C after the candidate has finished the practical tasks. Award the mark if the answer matches the expected answer in meaning.
- Complete the product checklist after the candidate has finished and saved all work in the folder PRACTICAL_[YourName].

Quantities are per candidate unless stated.

Part B: Product checklist (5 marks)

Complete this after the candidate has saved all work.

No.	*Item to be evaluated*	Met	Max marks	Marks awarded	Remarks
1	Folder PRACTICAL_[YourName] is on the Desktop and contains Reports, Images, Backup and Extracted, with every file correctly named and saved in the right folder	☑ Yes ☐ No	1	01	All Created Named
2	Word evidence document named Evidence_[YourName] is saved inside the main folder	☑ Yes ☐ No	1	01	Done
3	Required screenshots (Tasks 2, 8, 9, 10 and 11) are pasted into the evidence document and each is labelled with its Task number	☑ Yes ☐ No	1	01	Done

Part C: Oral questions (10 marks)

Ask each question orally and award the mark if the answer matches the expected answer

No.	Question	Expected answer	Max marks	Marks awarded
1	Name any two details shown in the Details view of File Explorer.	Any two of: name, date modified, type, size.	1	01
2	What is the difference between copying and moving a file?	Copying makes a duplicate and leaves the original in place; moving transfers the file so it no longer exists in the original location.	1	01
3	What happens to a file when you delete it, and how can you get it back?	It goes to the Recycle Bin; open the Recycle Bin, right-click the file and select Restore.	1	01
4	Why do we compress files into a ZIP file?	To reduce file size, to group several files into one, and to make storing, sharing and emailing easier.	1	01
5	Why should important files be protected with a password or encryption?	To prevent unauthorised access and keep confidential data safe, since the file cannot be opened or read without the password or key.	1	01
6	What is a file extension? Give two examples.	The characters after the dot in a file name that show the file type, for example .txt, .docx, .xlsx, .png or .zip.	1	01
7	Why do we organise files into folders and subfolders?	To keep related files together, make files easy to find and manage, and avoid clutter.	1	01
8	Name two ways of transferring a file to another location or device.	Any two of: flash disk, another drive or folder, email attachment, cloud storage, network sharing.	1	01
9	What is the difference between network sharing and cloud sharing?	Network sharing gives access to people on the same local network; cloud sharing (OneDrive or Google Drive) gives access over the internet through a link.	1	01
10	Why should you keep a backup copy of important files?	To avoid losing data through accidental deletion, corruption, theft or hardware failure, and to be able to restore it.	1	00
