

PRACTICAL OBSERVATION CHECKLIST

PRACTICAL 1 CHECKLIST

ICT TECHNICIAN LEVEL 5 –

MODULE 2,TERM 2

UNIT OF COMPETENCE: PERFORM COMPUTER OPERATIONS

UNIT CODE: 0611 351 02A

ELEMENT: MANIPULATE COMPUTERIZED SPREADSHEET

INSTRUCTIONS TO THE ASSESSOR

1. **Observe the candidate throughout the practical assessment** and award marks only for activities that are correctly performed and demonstrated according to the stated assessment requirements.
2. **Record the candidate's score immediately after observing each activity**, providing relevant comments where necessary to indicate strengths, errors, or areas requiring improvement.
3. **Assess the candidate fairly and consistently**, ensuring that the Product Checklist and Oral Assessment are scored separately and are **not included in the 50 practical-performance marks**.

CUTTING LIST

Item	Quantity	Provided By
Desktop computer/laptop	1 per candidate	Institution
Microsoft Excel or approved spreadsheet application	1 per computer	Institution

Printer	1	Institution
Printing paper (A4)	As required	Institution
Internet/network connection	1	Institution
Assessment paper/instructions	1 per candidate	Institution
Candidate writing pen	1 per candidate	Candidate
USB flash disk for saving work	1 per candidate	Candidate
Candidate name/identification details	1 per candidate	Candidate
Access to a suitable workstation	1 per candidate	Institution

TASK 1: CREATE AND ENTER DATA IN A WORKBOOK

(10 MARKS)

No .	Activity Observed	Allocated Marks	Candidate Score	Comments
1	Opened the spreadsheet application and created a new workbook	2		
2	Renamed the first worksheet Sales Report and created and renamed the second worksheet Summary	2		
3	Entered the given product names, January, February, March sales figures and Price per Unit accurately	4		
4	Added the Total Units and Total Sales column headings correctly	1		
5	Saved the workbook using the required filename Student_Spreadsheet_Practical.xlsx	1		
	SUB-TOTAL	10		

TASK 2: CELL REFERENCING, FORMULAS AND FUNCTIONS

(15 MARKS)

No.	Activity Observed	Allocated Marks	Candidate Score	Comments
1	Calculated Total Units using an appropriate relative cell reference formula and filled the formula down correctly	4		
2	Entered the 16% Tax Rate and calculated tax amount using an absolute cell reference	4		
3	Created a calculation table and demonstrated the use of an appropriate mixed cell reference	3		
4	Used appropriate spreadsheet functions to calculate Total Sales, Average Sales, Maximum Sales and Minimum Sales	3		
5	Created the Performance column and used the IF function to classify products as Good or Needs Improvement	1		

	SUB-TOTAL	15		
--	------------------	-----------	--	--

TASK 3: WORKSHEET EDITING AND DATA MANIPULATION

(10 MARKS)

No.	Activity Observed	Allocated Marks	Candidate Score	Comments
1	Inserted one new row above the existing data and inserted a new column before Price per Unit , entering an appropriate heading	3		
2	Adjusted row height and column width so that headings and data were clearly visible	2		
3	Copied the Sales Report worksheet, renamed it Sales Report Copy , and moved it after the Summary worksheet	3		
4	Deleted the Sales Report Copy worksheet correctly	1		
5	Edited the specified sales figures, added Flash Disk with sample sales figures, and inserted the Lookup worksheet	1		

	SUB-TOTAL	10		
--	------------------	-----------	--	--

TASK 4: LOOKUP FUNCTIONS AND WORKSHEET FORMATTING

(8 MARKS)

No.	Activity Observed	Allocated Marks	Candidate Score	Comments
1	Entered the Product and Category lookup table correctly on the Lookup worksheet	2		
2	Added a Category column to the Sales Report and used an appropriate XLOOKUP or VLOOKUP function to retrieve categories	3		
3	Applied appropriate font style, font size and bold formatting to the main headings	1		
4	Applied centre alignment, borders and shading to the data table appropriately	1		
5	Adjusted column widths appropriately for clear presentation	1		
	SUB-TOTAL	8		

TASK 5: CHART GENERATION AND WORKBOOK PRINTING

(7 MARKS)

No.	Activity Observed	Allocated Marks	Candidate Score	Comments
------------	--------------------------	------------------------	------------------------	-----------------

1	Selected the appropriate Product and Total Units data and created a suitable column chart	3		
2	Added the chart title Total Units Sold by Product , axis titles and data labels correctly	2		
3	Positioned the chart appropriately on the worksheet and configured suitable page orientation, margins and print area	1		
4	Ensured the worksheet and chart were appropriately fitted and printed the completed Sales Report worksheet	1		
	SUB-TOTAL	7		

PRACTICAL PERFORMANCE SUMMARY

Task	Allocated Marks	Candidate Score
Task 1: Create and Enter Data in a Workbook	10	
Task 2: Cell Referencing, Formulas and Functions	15	
Task 3: Worksheet Editing and Data Manipulation	10	
Task 4: Lookup Functions and Worksheet Formatting	8	
Task 5: Chart Generation and Workbook Printing	7	
TOTAL PRACTICAL MARKS	50	

PRODUCT CHECKLIST

SEPARATE FROM THE 50 PRACTICAL MARKS

No.	Product Criteria	Allocated Marks	Candidate Score	Comments
1	Workbook is correctly saved as Student_Spreadsheet_Practical.xlsx	2		
2	Required worksheets are correctly created, named and arranged	3		
3	Data has been entered accurately and calculated results are correct	4		
4	Relative, absolute and mixed cell references are correctly demonstrated	3		
5	Lookup results correctly display the appropriate product categories	3		
6	Worksheet is professionally formatted with appropriate headings, borders, alignment and shading	2		
7	Column chart is correctly generated, titled, labelled and presented	2		
8	Printed output is complete, clear and properly arranged	1		
	TOTAL PRODUCT MARKS	20		

PRODUCT CHECKLIST = 20 MARKS**ORAL ASSESSMENT CHECKLIST**

(30 MARKS)

No.	Question	Expected Answer	Allocated Marks	Candidate Score	Comments
1	What is a spreadsheet?	A software application used to organize, calculate, analyse and present data in rows and columns.	3		
2	Differentiate between a workbook and a worksheet.	A workbook is the spreadsheet file containing one or more worksheets, while a worksheet is an individual sheet within the workbook.	4		
3	What is a cell?	The intersection of a row and a column where data or formulas can be entered.	2		
4	What is relative cell referencing?	A reference that changes automatically when a formula is copied or moved.	3		
5	What is absolute cell referencing?	A fixed cell reference that does not change when a formula is copied, e.g. \$B\$2 .	3		

6	What is mixed cell referencing?	A reference where either the row or column is fixed while the other changes, e.g. \$A1 or A\$1 .	3		
7	What is the purpose of the IF function?	It tests a condition and returns one result when the condition is true and another when it is false.	3		
8	State four spreadsheet functions used in data calculations.	SUM, AVERAGE, MAX and MIN.	3		
9	What is the purpose of a lookup function such as VLOOKUP or XLOOKUP?	It searches for a value and returns related information from a specified data range.	3		
10	Why is print setup important before printing a worksheet?	It ensures that the worksheet is properly arranged, readable and fits appropriately on the printed page.	3		
	TOTAL		30		

ASSESSMENT SUMMARY

Assessment Component	Maximum Marks	Candidate Score
Practical Performance	50	
Product Checklist	20	
Oral Assessment	30	
TOTAL ASSESSMENT	100
