PRACTICAL OBSERVATION CHECKLIST

PRACTICAL 1 CHECKLIST

ICT TECHNICIAN LEVEL 5 – MODULE 1

UNIT OF COMPETENCE: COMPUTER ESSENTIALS

UNIT CODE: 0611 351 01A

TIME: 2 HRS **TOTAL: 50 MARKS**

INSTRUCTIONS TO THE ASSESSOR

1. Observe the candidate throughout the practical assessment and award marks only for activities that are correctly performed and demonstrated according to the stated assessment requirements.
2. Record the candidate's score immediately after observing each activity, providing relevant comments where necessary to indicate strengths, errors, or areas requiring improvement.
3. Assess the candidate fairly and consistently, ensuring that the Product Checklist and Oral Assessment are scored separately and are not included in the 50 practical-performance marks.

ASSESSOR NAME: James Ndirangu

CUTTING LIST

Item	Quantity	Provided By
Desktop computer (system unit with case open)	1 per candidate	Institution
Screwdriver set	1 per candidate	Institution
Anti-static wrist strap	1 per candidate	Institution
Soft cloth/brush	1 per candidate	Institution
Compressed air	As required	Institution
Monitor, keyboard and mouse	1 set per candidate	Institution
Labeled peripheral devices/cables	1 set	Institution
Printer	1	Institution
Speaker	1	Institution
Projector/third peripheral	1	Institution
Assessment paper/instructions	1 per candidate	Institution
Candidate writing pen	1 per candidate	Candidate
Candidate name/identification details	1 per candidate	Candidate

TASK 1: IDENTIFICATION OF COMPUTER COMPONENTS AND PORTS

(10 MARKS)

No.	Activity Observed	Allocated Marks	Candidate Score	Comments
1	Correctly pointed to and named 5 components inside the case	5	05	Named and Pointed
2	Correctly identified 5 ports on the rear of the system unit and stated one device that connects to each	5	05	Named and identified
SUB-TOTAL		10	10	

TASK 2: DISASSEMBLING AND CLEANING COMPUTER DEVICES

(10 MARKS)

No.	Activity Observed	Allocated Marks	Candidate Score	Comments
1	Wore/used anti-static precaution before touching internal parts	2	00	
2	Safely opened the case and disassembled the 3 named components using correct tools and safe handling	4	04	Opened and Named
3	Cleaned the case interior, fan, and removed components appropriately	4	04	cleaned and removed wa
SUB-TOTAL		10	08	

TASK 3: ASSEMBLING COMPUTER HARDWARE DEVICES (10 MARKS)

No.	Activity Observed	Allocated Marks	Candidate Score	Comments
1	Correctly reinstalled all 3 internal components in their proper slots/bays	4	04	Reinstalled Correct.
2	Correctly connected monitor, keyboard, and mouse to the appropriate ports	3	03	Correctly Connected
3	Closed the case properly and neatly managed cables	3	01	Some wrongly Placed cables with
SUB-TOTAL		10	08	

TASK 4: BOOTING THE COMPUTER (10 MARKS)

No.	Activity Observed	Allocated Marks	Candidate Score	Comments
1	Powered on the assembled computer, performed a correct cold boot and explained what happens during POST	4	04	Correctly Powered on
2	Performed a correct warm boot using the appropriate method	3	03	Performed Well
3	Stated one difference between cold and warm booting	3	03	Correctly Stated
SUB-TOTAL		10	10	

TASK 5: CONNECTING AND CONFIGURING PERIPHERAL DEVICES (10 MARKS)

No.	Activity Observed	Allocated Marks	Candidate Score	Comments
1	Correctly connected the printer and performed basic configuration	4	04	Connected correctly
2	Correctly connected the speaker and confirmed audio output	3	03	Connected correctly
3	Correctly connected and configured the third peripheral (e.g., projector display settings)	3	03	Configured correctly
SUB-TOTAL		10	10	

PRACTICAL PERFORMANCE SUMMARY

Task	Allocated Marks	Candidate Score
Task 1: Identification of Computer Components and Ports	10	10
Task 2: Disassembling and Cleaning Computer Devices	10	03
Task 3: Assembling Computer Hardware Devices	10	03
Task 4: Booting the Computer	10	10
Task 5: Connecting and Configuring Peripheral Devices	10	10
TOTAL PRACTICAL MARKS	50	46

DUCT CHECKLIST

PARATE FROM THE 50 PRACTICAL MARKS

NO.	Product Criteria	Allocated Marks	Candidate Score	Comments
1	Computer is correctly reassembled and fully functional	4	04	Correctly
2	Internal components are correctly installed and secured in the proper slots/bays	3	03	Installation good
3	Monitor, keyboard and mouse are connected to the appropriate ports	3	03	Connected well
4	Case is closed properly and cables are neatly managed	2	01	failed to put
5	Computer boots successfully to the desktop (cold and warm boot)	3	03	Correctly done
6	Printer, speaker and third peripheral are correctly configured and working	3	03	Correctly Configured
7	Case interior, fan and components are clean	1	01	Cleaned well
8	Work area is left tidy and tools are returned	1	01	Tidy Workplace
TOTAL PRODUCT MARKS		20	19	

PRODUCT CHECKLIST = 20 MARKS

(30 MARKS)

No.	Question	Expected Answer	Allocated Marks	Candidate Score	Comments
1	What is a motherboard?	The main circuit board of the computer that connects and allows communication between the CPU, memory, storage and other components.	3	03	Defined
2	State the purpose of an anti-static wrist strap.	It safely discharges static electricity from the technician's body to prevent damage to sensitive internal components.	3	03	Stated
3	Why should the computer be switched off and unplugged before opening the case?	To prevent electric shock and avoid damage to components and injury to the technician.	3	03	Stated
4	What is a port?	A socket on the computer used to connect peripheral devices and cables to the system unit.	3	03	Stated and Observed
5	Name two input devices and two output devices.	Input: keyboard, mouse (or scanner, microphone). Output: monitor, printer (or speaker, projector).	3	03	Input Computer stated
6	What is POST?	Power-On Self-Test: a diagnostic check performed by the BIOS/UEFI at startup to confirm that essential hardware is working.	3	03	Stated
7	Differentiate between a cold boot and a warm boot.	A cold boot starts the computer from a powered-off state, while a warm boot restarts it while it is already on without cutting power.	3	03	Differentiated
8	What is a device driver?	Software that enables the operating system to communicate with and control a hardware device.	3	03	Stated
9	Why is it important to clean computer components regularly?	Dust build-up causes overheating, poor performance and hardware failure; cleaning prolongs the life of the equipment.	3	03	Said
10	Why should cables be neatly managed after assembling a computer?	It improves airflow, prevents accidental disconnection and damage, and ensures safety and a tidy appearance.	3	03	Managed Well
TOTAL			30	30	

ASSESSMENT SUMMARY

Assessment Component	Maximum Marks	Candidate Score
Practical Performance	50	46
Product Checklist	20	19

Assessment Component	Maximum Marks	Candidate Score
Oral Assessment	30	30
TOTAL ASSESSMENT	100	95
